Dear customer,

Ref . REACH regulation for SERICOM products

Dear Customer,

being Sericom Italia S.r.L. a producer of screen and pad printing inks and not being a manufacturer of CHEMICAL SUBSTANCES, we are not compelled to submit any registration to REACH regulation.

According to the most updated information we got from our suppliers, **all raw materials included in formulation are registered or crafted with registered substances.**

We wish to underline, it is not compulsory for our suppliers to send us the pre-registration references for they are valid only within pre-registered companies and have no legal and guarantee value.

However, we wish to confirm our systems do not contain the substances mentioned in the "CANDIDATE LIST" updated November 7th 2024, and following modifications, **in concentration higher than 0,1%.**

Our product are not intentionally formulated with raw materials restricted in Annex XIV and Annex XVII of the Reach regulation [not including isocyanate based hardener; restriction are not applied to isocyanate with less than 0.1% of free monomer]; impurities or contamination of restricted substances reported in raw material safety data sheets are reported in Sericom Italia S.r.L. MSDS

Kind regards,

Pier Luigi Bolognesi

SERICOM ITALIA SRL
